

PENN ENTERPRISES × REDLANTERN STUDIOS

PE / REDLANTERN AUTOMATION SUBJECT BRIEF

BY RED, LLC · REDLANTERN STUDIOS · JULY 7, 2026

STATUS · PARTIAL

Bridged into Claudex as a coordination subject file. This brief renders the subject file found at **PE/RedLantern subject.md** in the Claudex repo. It points to the Penn Enterprises control plane artifacts on KP's machine. It is not the source of truth for live Make.com or n8n readiness.

SUBJECT

RedLantern AI Automation and the Lead Intake System sales and discovery answer bank for Penn Enterprises. KP wants RedLantern's existing and incoming AI automations to move forward within a permissible scope, so prospects can ask practical first call questions and the system can answer without overpromising.

THE PROSPECT QUESTIONS THIS ANSWERS

SYSTEM SHAPE

What does the lead intake system look like? Can I see it? Does it sit on top of my systems, below them, or mixed? What manual configuration is required?

INTEGRATION

Does it come with its own email? Can I bring Outlook? Is Google the only platform? Do you provide the CRM or integrate with mine? Can it route leads to the right employees? What is the cost per seat for my team?

CURRENT ANSWER — MIXED LAYER SYSTEM

The Lead Intake System is described as a mixed layer system. It sits **on top of** existing systems for visibility, dashboards, reminders, and summaries. It sits **between** systems for intake, routing, CRM updates, inbox handoffs, and scheduling handoffs. It sits **below** the process when RedLantern provides the routing logic, tracker, proof logs, and failure alerts. It is never framed as a forced replacement for the client's email, CRM, or process.

CLIENT SAFE POSITIONING

APPROVED FRAMING

"The Lead Intake System catches new leads, organizes them, routes them to the right person, and helps your team follow up faster without forcing you to abandon the tools you already use." — "Most installs are mixed. We do not rip out your process first. We map how leads currently move, keep what is working, and place automation around the handoffs where leads get delayed, duplicated, or lost."

NO OVERPROMISING

MIXED LAYER INSTALL

PROOF BEFORE CLAIMS

KP APPROVES SCOPE

PERMISSION BOUNDARY

ALLOWED THROUGH THIS SUBJECT

Discovery · categorization · internal sales answer bank drafting · proof planning · demo planning · packaging · client safe framing drafts.

REQUIRES KP APPROVAL + PROOF

Production Make.com edits · n8n activation or workflow changes · public claims · client commitments · paid spend · exact vendor pricing claims · claiming a prospect's Outlook, CRM, or mailbox is connected before a live connection test.

OUTLOOK STATUS

Make.com has Microsoft 365 Email Outlook integration pages

VERIFIED

n8n has Microsoft Outlook node, trigger, and credential documentation

VERIFIED

Prospect's Microsoft account type and tenant admin consent requirements

UNKNOWN

Mailbox security policy and testability in the prospect environment

UNKNOWN

SOURCE ARTIFACTS — RETRIEVAL IN FLIGHT

Four source files hold the full answer bank and scope material. They live on KP's machine under **Penn Enterprises LLC/operations/handoffs/** and are not yet in Claudex:

ANSWER BANK

REDLANTERN_LEAD_INTAKE_PROSPECT_ANSWER_BANK_2026-07-07.md

SCOPE

REDLANTERN_AI_AUTOMATION_PERMISSIBLE_SCOPE_2026-07-07.md

QUEUE

PE_INCOMING_AUTOMATION_DISCOVERY_QUEUE_2026-07-07.md

DISCOVERY

CLAUDEX_PE_INCOMING_AUTOMATION_DISCOVERY_2026-07-07.md

ASK FILED

Q-20260707-02 (keymon claudex) and Q-20260707-03 (keymon codex) request export of all four into PE/handoffs/ in Claudex. Bridge receipts: TC-20260707-012, TC-20260707-013.

NEXT CLAUDEX ACTIONS

1. Categorize existing lead intake automations against the prospect questions. 2. Verify the live demo path. 3. Verify Make Grid organization and scenario context. 4. Verify n8n workflow inventory and health. 5. Verify CRM and email claims before any client facing use.

TRUTH BOUNDARY

This brief is a bridge pointer and operating brief. It is **not proof** that a live demo exists, that a client's Outlook tenant is connected, that a client's CRM is integrated, that team seat pricing is known, or that Make.com or n8n production state is ready. Those claims require fresh receipts.
